

WELCOME TO THE **POSICHARGE™ SOLUTION**

IMPROVE PRODUCTIVITY AND REDUCE OPERATING COSTS WHILE CREATING A GREENER, SAFER WORK ENVIRONMENT.

UPTIME AND SAVINGS

Eliminate battery changing, say goodbye to downtime, and reduce inventory to one battery for every truck in most circumstances. Keep the battery in the truck, where it belongs – keeping the vehicle productive and recharge during scheduled breaks, lunches, and shift changes.

SAFETY

By eliminating battery changing, your employees no longer have to handle heavy batteries or risk cross-plant traffic accidents while driving to the battery room. In addition, fewer batteries mean less hazardous material in your facility.

BATTERY LIFE

With more than 10,000 charging stations delivered, PosiCharge systems have a proven track record of prolonging battery life. We have many examples of customer batteries that have been in service for more than five years in a fast charge application, as well as a heavy-duty auto manufacturing customer who owned fast-charged batteries that retained 92% of their rated capacity after three hardworking years.

HERITAGE

PosiCharge systems are products of AeroVironment, Inc. (AV), an American technology company that designs, manufactures, markets, and supports efficient electric energy systems. Seven vehicles developed by AV and its people are in the Smithsonian Institution's permanent collection. AV has made its mark in the electric vehicle (EV) world as a major systems developer for the first practical electric vehicle, the General Motors Impact. PosiCharge, along with AV's leading line of advanced EV cycling and test systems, have helped AV establish a leadership position in the EV industry as a clean transportation innovator in both commercial and industrial markets.

PosiCharge systems replace the battery room with drive-up charging stations placed in distributed work cells.

MORE POWER TO YOU.
