

2015 SUMMER INTERNSHIP APPLICATION INSTRUCTIONS

1. Apply on-line to Summer Engineering Internship at <http://www.avinc.com/careers>. The job # is 14-117.
2. Candidates that are selected for the next step will receive an internship questionnaire via email in the Jan. / Feb. 2015 time frame.
4. The completed questionnaires will be reviewed and candidates will be selected for telephone interviews.
5. Hiring managers will make decisions and offers will be extended in the April/May time frame.

We look for the following in our intern candidates:

1. A GPA of 3.0 or above and a major in any of the following: aerospace engineering, mechanical engineering, electrical engineering, or computer science/software engineering.
2. We also look for extra-curricular activities that relate to a student's major or hobbies that pertain to our business such as the Design/Build/Fly competition or RC plane experience. Experience with batteries and/or industrial vehicles as well as an interest in renewable energy is also a plus.
3. Communication skills and the ability to work in a team environment are also important.

General information

We typically hire college juniors and above into our internship program. By college junior, we mean one who has obtained junior level standing in one's major (not overall).

This position requires you have access to data and technology that is subject to the International Traffic in Arms Regulations (ITAR). Applicants cannot be hired until they are qualified to have such access.

AeroVironment, Incorporated is an equal opportunity / affirmative action employer.
