AeroVironment’s tactical missile systems close the gap between observation and action, giving troops the ability to identify threats and deliver a precision lethal payload with minimal collateral damage. Their small size and low acoustic, visual and thermal signatures make them difficult to detect, recognize or track, even at close range.

Rapidly deployable, highly maneuverable, with high performance optics and scalable munition payloads, AeroVironment’s Switchblade™ loitering missile systems enable the warfighter to easily launch, fly, track and engage beyond line-of-sight targets and light armored vehicles across land, maritime, and air launched scenarios.

When every second counts, AeroVironment’s tactical missile systems deliver the actionable intelligence and precision firepower needed to achieve mission success across multiple domains.
