

Multi-Pack Launcher

AeroVironment's Multi Pack Launcher (MPL) is an all weather remotely operated autonomous launch battery for standard Switchblade® missile and Blackwing™ ISR systems.

The MPL with 6 round capacity can also be vehicle or ship board mounted for mobile operations. The launcher provides several power choices: solar with internal battery and shore/Tactical Vehicle power. The MPL is equipped with a 100' remote operation control cable providing flexible application in FOB/COP Operation bunkers & buildings, Tactical Vehicles, and Ship command centers.

SPECIFICATIONS

CONFIGURATIONS	6 pack Standard (Alternates for 2-20 AURs possible)
SIZE	28" wide, 34" deep by 28" tall
WEIGHT	~130 lbs empty, ~160 lbs loaded
MOUNTING	Hold downs for vehicle or ship board use
POWER	Solar panel and internal battery, Shore/TacVeh power augments to maintain internal operating temps
CONTROL	100' remote operation control cable (FOB/COP Ops Cell bunker/buildings, Tactical Vehicles, Ship CIC)

KEY FEATURES

- Rapid Placement – two man lift
- Ease of Operation – Simple interface, common Switchblade controls
- Rapid Reload - < 30 seconds per round
- Flexible load out
- Rapid ground emplacement
- Low observable remote ops
- Tactical Vehicle/ MRAP
- Shipboard – integrated or secured to deck
- Scalable design accommodates additional launch vehicles
