

Switchblade® 600 LOITERING MUNITION

Switchblade® 600 represents the next generation of extended-range loitering munitions. Featuring high precision optics and over 40 minutes of endurance, Switchblade 600 provides unprecedented RSTA and precision strike capabilities against larger, fixed or moving hardened targets via anti-armor warhead. This provides the ability to prosecute non-line-of-sight targets with precision lethal effects at a greater stand-off distance, without the need for external ISR or fires assets. This all-in-one, man-portable solution includes everything required to successfully execute missions across land, sea or air with four Fire Control System (FCS) options to meet your changing tactical environment. Easily train, plan missions and execute flight operations through an intuitive, touch screen tablet Fire Control Unit (FCU).
